

U.S. Application No. 09/603,658

VERSION WITH MARKINGS TO SHOW CHANGES MADE

In the Claims:

Please amend the following claims:

13. (Twice Amended) The library of claim 1, wherein the library of fusion proteins encode [a class of] multimeric proteins that are comprised of at least two subunits and the first and the second polypeptide subunits are subunits of a multimeric protein [in the class].

43. (Amended) The library of claim 1, wherein the first nucleotide sequence and the second nucleotide sequence respectively encode a heavy chain variable region and a light chain variable region of a human immunoglobulin [gene].

44. (Amended) The method of claim 1, wherein the first nucleotide sequence encodes a heavy chain variable region of a first human immunoglobulin [gene], and the second nucleotide sequence a light chain variable region of a second human immunoglobulin gene different from the first human immunoglobulin [gene].
